

GUS NEWSLETTER

AUGUST—SEPTEMBER 2013

Hello!

GUS programs are generally long-term ones, like the one in Besakih. We continued to do the composting research to determine the best method being applied at the facility.

Environmental Education at TK Kusuma Dharma Jimbaran

We delivered education on waste management for the kids. It was part of the commemoration of Independence Day, which followed by Jimbaran beach clean up.

Beach Clean Up with Surf Time

This activity was carried on Seminyak Beach with other communities .

Project Clean Uluwatu Update

The meeting was to discuss on how the Warungs could meke contribution to the project. Its important as a form of awareness because the warungs should be the ones who manage the facility on long term basis.

Composting Research at Besakih

The research was continued to determine the best method to be applied to process the organic at Besakih. Organic waste comes mostly from ceremonial activities in Pura Besakih.

Visiting River Camp

The camp was organized by Yayasan Garuda Wastu Lestari with the support of city administration of Denpasar, held on the riverbank in the area Kesiman, East Denpasar. Participants came from students of Junior and Senior High School in Denpasar. Activities include education about waste management, river preservation and animals conservation.
